European Good Practice in eHealth Systems and Application in Hospitals

Success stories and lessons learned

Pre conference workshop

at the
World of Health IT Conference

Vienna, Austria

22nd October 2007

Time	22nd October 2007
	14:00 – 18:00 hrs (2½ h + break + 1 h)
Location & Venue	Austria Center Vienna
	Bruno-Kreisky-Platz 1
	A-1220 Vienna
	Hall I
Background and objectives	Experts agree that hospitals will be part of associated virtual healthcare networks which are already beginning to emerge and which will be central to new forms of healthcare delivery. Hospitals are and will be "key stakeholders" in the Health Care Arena.
	In this workshop 5 good eHealth cases will be presented, covering a wide range of eHealth implementations. Topics covered amongst other are the development and implementation of an electronic patient record, the implementation of a resource planning tool in order to manage and streamline activities, the large scale adoption and benefits of a medical data secured internet transmission service currently connecting over 8000 General Practitioners and 700 laboratories, the development of alternative communication channels to attract medical professionals to continuous medical education and last but not least the importance of information systems in order to manage hospitals, based on knowledge instead of guesses.
	This workshop will be complemented by market review of the state of art in this field so to answer the important question: are Europe's hospitals ready for eHealth? This information is covered by the Health Information Network Europe (HINE) hosted by Deloitte.
	In the last section of the workshop we would like to have a Look at the Future focusing on the Vision of IT and eHealth from an industry perspective, and how to align Vision with the Healthcare Reality.
	The final objective of the workshop is to show and present selected good eHealth hospital cases, in order to share knowledge and learn from their success factors and failure factors and to conclude how vision, leadership and sustainability can be realised with the involvement of the different health care stakeholders.

Session Programme

14:00	**Welcome and introduction: The good eHealth project – hospitals as important stakeholders in Health Care**
	Diane Whitehouse, Good eHealth Advisory Board Member

14:15	**The HINE project: Results of the eHospital census**
	Ingrid Moldenaers, Good eHealth project manager, Deloitte Belgium

14.30 **Presentation of Good eHealth projects**

- **Development of an Electronic Patient Record (EPR) at Homerton University Hospital, England**
  Reinhard Hammerschmidt, empirica, Germany & Tom Jones, national correspondent UK good eHealth project
- **Implementation of a Resource Planning System (RPS2) at Landeskrankenhaus Universitätskliniken Innsbruck**
  Christian Stark, Tiroler Landeskrankenanstalten GmbH – TILAK - Austria
- **Bioserveur - A Medical Data Secured Internet Transmission Services connecting over 8000 General Practitioners and 700 laboratories in France: From Rationale to Vision towards current Benefits and Adoption**
  Rémy Pillot, Président de la Commission Medi@bio Rhone-Alpes - France
- **The Pentalfa project: Organisation of continuous medical education for Health Care professionals in the Flemish region**
  Prof Dr. P. Herijgers, University Hospital Leuven, Belgium
- **Managing hospitals: added value of clinical information systems**
  Prof Dr. Christian Lovis, University Hospitals Geneva, Switzerland

Q& A

16.45	**Break**

17.15	**An industry perspective: eHealth from Vision to Reality**
	Dr. Dirk Colaert, MD, Advanced Clinical Application Manager, Agfa HealthCare
	Q & A

17.35	**Concluding remarks**
	Diane Whitehouse, Good eHealth Advisory Board Member
